[Building Pangaea Gizmo Answers](#)

(a) The distribution of late Paleozoic glacial deposits and striations on present-day Earth are hard to explain. But on Pangaea, areas with glacial deposits fit together in a southern polar cap.

(b) The distribution of late Paleozoic rock types plots sensibly in the climate belts of Pangaea.

(c) A plot of fossil localities shows that Mesozoic land-dwelling organisms occur on multiple continents. This would be hard to explain if continents were separated.
